To me a call from unknown telephone number, and I surprised it is called the chief of the police department of our city. I was invite with him on meeting. It was strange, because the chief of the police department never a straight line call, he gives the order to staff and they invite. When I came on the meeting with chief, we met. And the chief said me, 'I want to hear about your God', tell me about Him. And I became happy tell him about Jesus, our conversation became for a long time, he gave me questions and I answered those questions. After the end of our conversation, the chief asked me If I can call you, will you have a time for our conversation, and I agreed. Also at present I pray for him so that God opens his heart.

The doctors at the hospital did not want to take him, but then took him to hospital. When he was in the hospital in three days, at him came out of the body ten liters of water. But before this incident he had already stopped smoking, and we continued to pray for him and for doctors who treated him. For doctors too was surprised of such a sick they had the first time.
